

# CAG Tech Subcommittee

Review of FDR  
To April 11, 2006

# Positive Changes

- Reduced structural fill needed
- Filter cake storage has air filtration
- Self-contained stormwater system
- Full rail loading capacity
- Changed access road
- Only daylight hours for loading

# Facility Issues (Contracts 1 to 3)

- Data availability
- Full covering of all processing and storage facilities
- Schedule
- Navigational Dredging between Locks 7 & 8
- Noise: additional data request
- Traffic: level of service analysis
- Diesel Emissions

# Dredging Issues (Contracts 4 to 6)

INITIAL REVIEW ONLY: Next Tech. Mtg 4/20

- Capping and Field decision: how will that work, by whom, on what, under what criteria?
- Capping in River: building understanding
- Controls on Dredging
- Resuspension Monitoring
- Habitat
